

ADDENDUM NO. __01__

Date: ____7/8/26____

ROSAMOND COMMUNITY SERVICES DISTRICT

TANK 3 RECOAT PROJECT

3179 35th Street West, Rosamond, CA 93560

Project No. 12512

NOTICE IS HEREBY GIVEN to bidders and plan holders that in reference to the contract documents of the above-mentioned project, the following will be noted:

Item #1

Question: Do the existing interior and/or exterior coatings contain lead and if so, how much?

Response: Coatings were not tested, but the existing tank coating was applied around 34 years ago.

Item # 2

Question: Are any logos being painted on the tank and if so, what kind and how many?

Response: Yes. (Please note that there are logos as noted in the specs i.e. per Appendix B, we noted to relabel tank, and on Exhibit 5 you can see one label which is the "confined space" label; however, the number of logos will require field verification by contractor.)

Item # 3

Question: Reference Bid Form #2. What does the inspection blast entail?

Response: The intent of the inspection blast is to perform limited abrasive blasting for condition assessment purposes. The Contractor shall abrasive blast five (5) representative test areas approximately 4 feet by 4 feet each at locations designated by the Engineer or Owner's Representative. These areas will be selected in locations exhibiting significant corrosion, coating failure, rust staining, or suspected section loss. The purpose is to expose the underlying steel to evaluate the extent of deterioration and determine whether steel repairs are required. The inspection blast is not intended to constitute full interior surface preparation or complete coating removal of the reservoir.

Item # 4

Question: Reference Bid Form #6. What is the interior safety clip?

Response: It should read, "Interior Safety Climb".

Item # 5

Question: Reference Coating Rehabilitation Specification Part 5 Section 1 #1. Who is responsible for removing the internet tower? Are there any other antennas on the tank and if so, who is responsible for removing them?

Response: The Contractor shall be responsible for coordinating and performing all work necessary to complete the coating rehabilitation project, including the temporary removal, protection, and reinstallation

of any antennas, internet equipment, or appurtenances that interfere with the work. The Contractor shall verify existing site conditions and coordinate with the Owner and service provider, as necessary, prior to removal.

Item # 6

Question: Reference Coating Rehabilitation Specification Part 5 Section 11 #3. Please confirm we are to pole sand the entire exterior of the tank. Is there any clear coat on the exterior of the tank?

Response: Yes, the intent is for the Contractor to pole sand/degloss the entire exterior shell and associated appurtenances identified within the contract documents prior to application of the overcoat system. A clear sealer coat is specified as part of the overcoat system. The specified sealer coat is Sherwin-Williams Macropoxy 5000, which is intended to seal the existing coating system prior to application of the finish coat.

Item # 7

The following bid items were added in addition to those previously provided:

Item	Description	Unit	Quantity
10	Welding Repair per Pit	EA	25
11	Welding Repair per Linear Foot	LF	10
12	Seal Welding Repair 4"X4" Plate	EA	5
13	Welding Repair per Hour	HR	4
14	Nut and Bolt Replacement	EA	10

Additionally, Bid Item No. 9 for Unforeseen Repair Allowances has been reduced to \$133,000. Refer to specification section 004100 found attached to this document.

The following Addenda were issued, modifying the Project Manual:

Addendum No. 1, issued on July 8, 2026.
